

A) How will you achieve this in AI?

We can discover solutions using ML concepts. By obtaining the relevant dataset from the company and applying appropriate ML algorithms, we can identify patterns or make predictions within the data. Based on these insights we can take actionable steps to provide feasible solutions.

B) Find out the 3 -Stage of Problem Identification

1. Machine Learning
2. Supervised ML Algorithm
3. Classification

C) Name of the Project: Employee Churn Prediction

D) Create the dummy Dataset.
